## UPDATE: Options for Female Libido – NEW ADDITION!!

One of the top reported symptoms we regularly receive from women is a decrease in sex drive and difficulty climaxing, especially during peri-menopause and menopause. We've now added a Nitric Oxide boosting Vaginal serum to the offerings!! This option provides quicker onset and initial patient reviews have been very positive. These formulations have benefited female patients by **increasing vaginal lubrication, vaginal stimulation (with increased blood flow and dilation), and improvement in reaching climax.**

Here's an updated list of our compounded options: (Rx Templates & samples available upon request)
